

# Blacknegative

<http://blacknegative.com/#!/twist/>

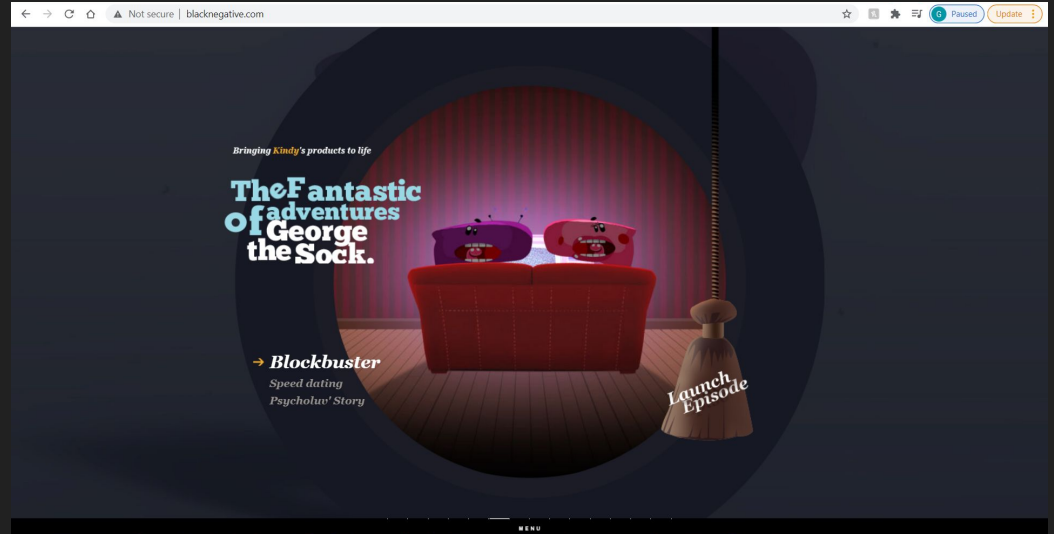

# Recognition Rather Than Recall

In the main screen it starts you off showing how to navigate through the screens and it also gives you a icon for your mouse so you don't forget what you can do.

# Consistency and Standards

On this page they give you 4 words that look like they should be buttons, but when you go to click them nothing happens.

# Flexibility and Efficiency

You can either navigate through the website by dragging to the right or it gives you the option to click the bottom to pull up a menu to navigate quicker. When you drag your mouse off the menu it shows an icon letting you know you can click anywhere to get out of the menu.
